Ccrc online form

When we refer to the size of a computer or component, we may be talking about its capacity, speed or connectors. Or we could talk about its dimensions, how much physical space it occupies on the desktop, inside the PC box, in a server rack or in a briefcase. We apply the term form factor to this last interpretation, to describe the size and packaging. Like a lot of computer terminology, form factor began as a technical stenographer, but was later adopted as a marketing term as well. Thus, in many cases, the form factor refers to a strict and technological definition, while in others it is a vague and non-standard promotional term. Plus Computerworld QuickStudies Here we offer a quick overview of common form factors (highlighted in italics) for different types of products. Hard drives For disk storage, the form factor is roughly synonymous with the diameter of the disk tray. Today, the standard form factor for optical drives is 5.25 in. (in a 1.75-in.-thick package that was called half-height, but is now the norm), and for desktop hard drives, it's 3.5 in. (but starts to go to 2.5 in.). For laptops, for many years, the standard form factor has been a 2.5 in. drive, but small laptops move to smaller drives - 1.8 in., 1.0 in. and now even 0.85. Laptop drives are also characterized by their thickness or height, usually 17, 12.5 or 9 mm. Flash memory/dvcs memory cards used in laptops, digital cameras, portable devices, music players and other portable devices are described according to their capacity, megabytes, and their configuration: in order to decrease physical size, these form factors include PCMCIA (also PC Card and CardBus), Compact Flash Type III and the thinnest Type II, Memory Stick and Memory Stick Pro, SmartMedia, The physically identical MMC (Multimedia Card) and SD (Secure Digital) card, Mini-SD, and the newest, XD-Picture Card. (To keep the record straight, most of these form factors are also used for i/O or other nonmemory devices.) None of these form factors, of course, includes the more recent wave of key rings flash memory cards that plug directly into a USB port. Surprisingly, no name or descriptor form factor has emerged for these USB devices. Desktop PC boxes What is the size (and shape?) of the box that holds your PC? In addition to referring to the type of motherboard (s) a case is designed to accept, we also describe the case as a tower (sometimes full tower, with the greatest capacity to hard drives), midtower or mintower (same basic shape, but shorter), microtower (smaller still, usually capable of handling only a single floppy disk and optical drive); The superflat pizza box; and the all-in-one (combining monitor, storage and electronics in one package). A somewhat confusing term nowadays is a weak form factor (sometimes abbreviated SFF), which usually refers to a small box in the shape of a near cube that may require proprietary components, best illustrated by Computer Inc. computers or the Aria case of Antec Inc. Small form factor is also used to describe the smaller speakers in the line of a given manufacturer, regardless of the shape. What do you want to name your company? Packages starting at \$49 (plus state filing fees) Nolo's filing includes: Validating the company name Validation Articles of Incorporation Unlimited Customer Service Banking Support and other automated error verification resolutions and more... Answer a few questions so we get to know your business better. We offer a number of packages for you to choose from. Select the one that works best for you. And one of the most attractive computers out there is macbooks. These stylish transportable computers allow you to work anywhere at any time and provide a lot of features for their users. But sometimes that's not enough. In so many cases, you're looking for more. While you might go for some productivity apps, there are actually plenty of macbook accessories available that will make your life easier in many ways. These additional accessories will allow your macbook to recharge faster, contain more data or protect it while you're traveling. Beyond that, there is a wide variety of accessories to choose from among as many companies have jumped in the supply train for macbook users. Below, we've listed some of the biggest macbook accessories that will benefit your computer. What makes great Macbook accessories? Before we entered the list, we wanted to take into account the criteria of what makes great Macbook. The items we have selected in this list will have the following criteria: At a reasonable price - Accessories themselves should not break the bank compared to the significant initial investment of a macbook. Easy to use - All of these accessories are practical in various situations, however, they also have additional features that make them useful in a few situations beyond their obvious functions. Compact - Workflow is also a matter of space in most circumstances. As such, anything that is too bulky does not help much. These accessories are Great on purpose - for storing other items - or are nice and compact so they won't get in the way. A USB stick to store files quickly without accessing the CloudWhile you can always access the cloud at any time, sometimes accessibility can be cumbersome or time-time. Instead of trying to access the files this way, getting a USB stick can save you a lot of time. Especially if your job involves providing presentations. The SanDisk Ultra Dual Drive is ideal because it offers USB-C and USB-A connectors that allow you to plug in virtually any device and transfer files and more between computers. In addition, USB sticks have several hundred gigabytes today, making them solid storage devices. Buying SanDisk Ultra Dual Drive here.Compact Charger which does more than default chargeYour that comes with your MacBook is a good option for a charger, but these days chargers can offer a lot more. This can help you speed up your workflow as you can load other devices or using the charger for other uses beyond the load. In the case of the Anker PowerPort charger, it is more compact than the default charger. It also offers another USB-C connector allowing you to quickly load another gadget with it. Buy the Anker PowerPort charger here. Port adapter for those with multiple devicesOne of the hard restrictions with a macbook is that it has only two USB-C ports. This is manageable for people with fewer gadgets, but if you're the kind that has several, it can interrupt your workflow if you need a particular device and you can't load or access it. In this case, a Satechi port adapter can help. It offers multiple USB-C ports that allow you to use multiple devices. It can also help organize cords that we know can disrupt work. If USB-C ports aren't enough, it also comes with an SD card reader and an ethernet cable port too. Buy Satechi Multi-Port Adapter here. A USB cable that is not as intrusive or cumbersome to useThe USB-C cable that comes with macbooks is small and is used to hang on to an external monitor. By adding more length to them, you can have better cable management. One option we found ideal was the Nomad Kevlar cable which offers enough length to do what you want while giving you more space to work with. Buy Nomad Kevlar USB-C Cable here. Cleaning your laptop screen to see what you're doingDust, particles and stains are to be expected on laptop screens after a while. While you can work around these, they can obscure your vision at times. The same can be applied to all devices these days. The only problem with many solutions on the market is that they can damage screens. Fortunately, we found a screen cleaning solution that doesn't harm the screens. ScreenDr Professional screen cleaning kit comes with a spray that is safe for screens and an antimicrobial microfibre fabric to make sure you get the most out of spraying. Buy ScreenDr Professional Screen Cleaning Kit here. Card reader that speeds up photo transfer timeIf you're looking for a standalone card reader for your work, getting a camera designed for photo transfer and reading is essential. One of the best macbook accessories in this category that we found was the Vanja card reader. It is able to read SD and MicroSD cards while transferring photos to a computer with ease thanks to its USB-C and USB 2.0 port options. It is also small, making it easy to carry and is cheap to buy making it a great choice to pick up if you are dealing with lots of photos. Buy Vanja Card Reader here. Protective sleeves to protect your laptop from damageFor those who travel the last thing you want is your laptop to get damaged for some reason. Even if you're not likely to drop it as frequently as your phone, having a sleeve for a laptop to be in can save you time. One sleeve that we found interesting was the sleeves of the Aboriginal Union. They are made of tear-resistant materials with real leather accents. Its interior is soft so prevent scratches from your laptop. It also offers a pocket space where you can store cables and other macbook accessories easily. Buy the Native Union laptop pouch here. Car charger to charge on the goFor the person always driving around, a car charger is always a useful tool to have when you are on the road. Anker's is particularly useful in many ways. Not only can this charge your macbook, but it also has an extra port for you to charge your phone if necessary. It's not the fastest charger out there compared to the Macbook Pro adapter, but it's the highest on the market with 30 watt output. For comparison, the second fastest charging connector has 18 watts of power. Apart from that, the charger has an illuminated LED ring for you to see and connectors late at night. It also has a function that ensures that the devices do not experience power surges or overheating of the charger itself. Buy anker PowerDrive car charger here. USB-C USB-A Adapter gives access to older modelsIf your old macbook still works, but has files that you want you don't have back that you want this, it's easier to access it. It also allows you to access devices that have USB-A locations only. This can save you a lot of time if you move between older and newer devices. Buy Thunderbolt Adapter here. A Hardshell case for extra protectionA handle is good for traveling, but You use it, having an extra layer of protection can be nice. Beyond that, this clamshell case can also serve as extra protection against scratches and bumps too. Buy Incase Textured Hardshell case here. Alternative sleeve for those who have tighter budgets but want protectionIf you are looking for a suitable laptop sleeve, but not looking to spend too much, amazonbasics brands are a good alternative. Their sleeves are elegant and always offer good scratch protection as well. It also has some pockets for small essentials too. Buy AmazonBasics laptop sleeve here. A hub that hosts several At the same time, we have already mentioned a port before being a huge time saver thanks to it having different ports for different devices. This one is a great alternative because while it doesn't offer as many USB-C ports, it offers more variety. Combined with the design being the same color as the MacBook Air, it offers two USB-C connectors, two USB 3.0 ports, an HDMI port and SD and microSD card readers. Buy Satechi Type C Pro Hub here. Headphones to deal with less headphone cordCords are a common problem when increasing productivity in the office and one way to mitigate them is to go wireless. If you're thinking about it, one option to consider is Soundcore headphones. These are cheaper than Apple's traditional AirPods which can save you money. In addition, they offer excellent sound and are connected via Bluetooth. The beauty of these headphones is that they can also cancel the sound despite their so compact. They also offer touch control that allows you to pause, play, skip music and answer calls. Buy Soundcore wireless headphones here. Office stand to save SpaceDesk office space is another crucial part of the productivity that things can get in the way and hinder your work. In cases where you don't need your laptop at the moment, having a stand where you can set it aside can be helpful. In these situations, we recommend the Arc of the Twelve Books of the South. This neat Macbook accessory can save a ton of space because it forces you to close your laptop to insert it into the booth. It also keeps it high from the surface which can protect it from spillsBuy Twelve South BookArc office stand here. A comfortable and easy-to-use mouse for faster working speedThe last of the macbook accessories we'll be talking about is a good mouse. Logitech offers fantastic mice and their Logitech MX Master 3 is one of the biggest wireless mice out there. Its ergonomic design, customizable buttons and incredibly precise movement are fantastic. It also comes with a scroll wheel for precise scrolling. Battery power can last months between charges and like all Logitech devices, it comes with a USB-C connector for charging. Buy Logitech MX Master 3 Wireless Mouse here. Bottom LineThere are a lot of macbook accessories out there to improve your workflow. Taking the time to do research and investing in some of the best however will save you a lot of time, money and energy in the long run. At the same time, all these accessories can help you with specific needs for everything you do. Featured photo credit: Viktor Ritsvall via unsplash.com
